Request for Continued Examination

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/24/2008 has been entered. An action on the RCE follows:

Claims 1, 3, 5, 9, 11 and 13 are amended, and claims 2, 4-8, 10 and 12 are cancelled. Thus, claims 1, 3, 5, 9, 11 and 13 are pending. The applicant's remarks, see pages 5-8 with respect to the amendment have been fully considered and are persuasive. The previous rejections filed on 1/17/2008 stand withdrawn.

Reasons for Allowance

Claims 1, 3, 5, 9, 11 and 13 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ohmori et al. (US 5,970,035) teach "an optical disc device whereby it may be discriminated whether the loaded optical disc is a first optical disc having a standard recording density or a second optical disc having a higher recording density for controlling tilt of the objective lens with respect to the optical disc for realization of high-precision skew control" column 2, lines 45-51.

Kanamaru (US 4,634,853) teaches “said light-detecting means comprises two light-detecting elements disposed such that a difference is produced between respective outputs of said light-detecting elements in accordance with said offset in said relation of perpendicularity, said tilt control means being driven in response to said difference between said outputs” column 8, lines 57-63.

The improvement of the claimed invention directs to the optical disc player, which includes the sensing controller detects the optical disc being upside down or tilted, while preventing any damage to the pick-up head, which is expensive to replace.

The following is an examiner’s statement of reasons for allowance:

The prior art of record does not teach or suggest the limitation of claim 1 recited “a light blocker for blocking light emitted by the light source from projecting onto the light-sensing device when the optical disc drive is tilted and has a tilt angle within a predetermined range, wherein the light blocker is rotated around a rotating axis; and wherein the optical disc drive is in the off mode when the optical disc drive is tilted” along with other limitations of claim 1.

The prior art of record does not teach or suggest the limitation of claim 9 recited “blocking the light according to the tilt angle with a light blocker when the optical disc drive is tilted, wherein the light blocker is rotated around a rotating axis; and wherein the optical disc drive is in the off mode when the optical disc drive is tilted” along with other limitations of claim 9.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
